ERRATA

GOOD FOR THE GOOSE BOX

Lid & Base panels chart, p.69

There is an error in the chart for the lid panel. The stitching below the geese, beginning with the upper line of long-arm cross stitch and continuing to the half-Rhodes stitch at the lower point, has been incorrectly positioned one fabric thread further to the right than they should be.

**See the corrected chart below.**
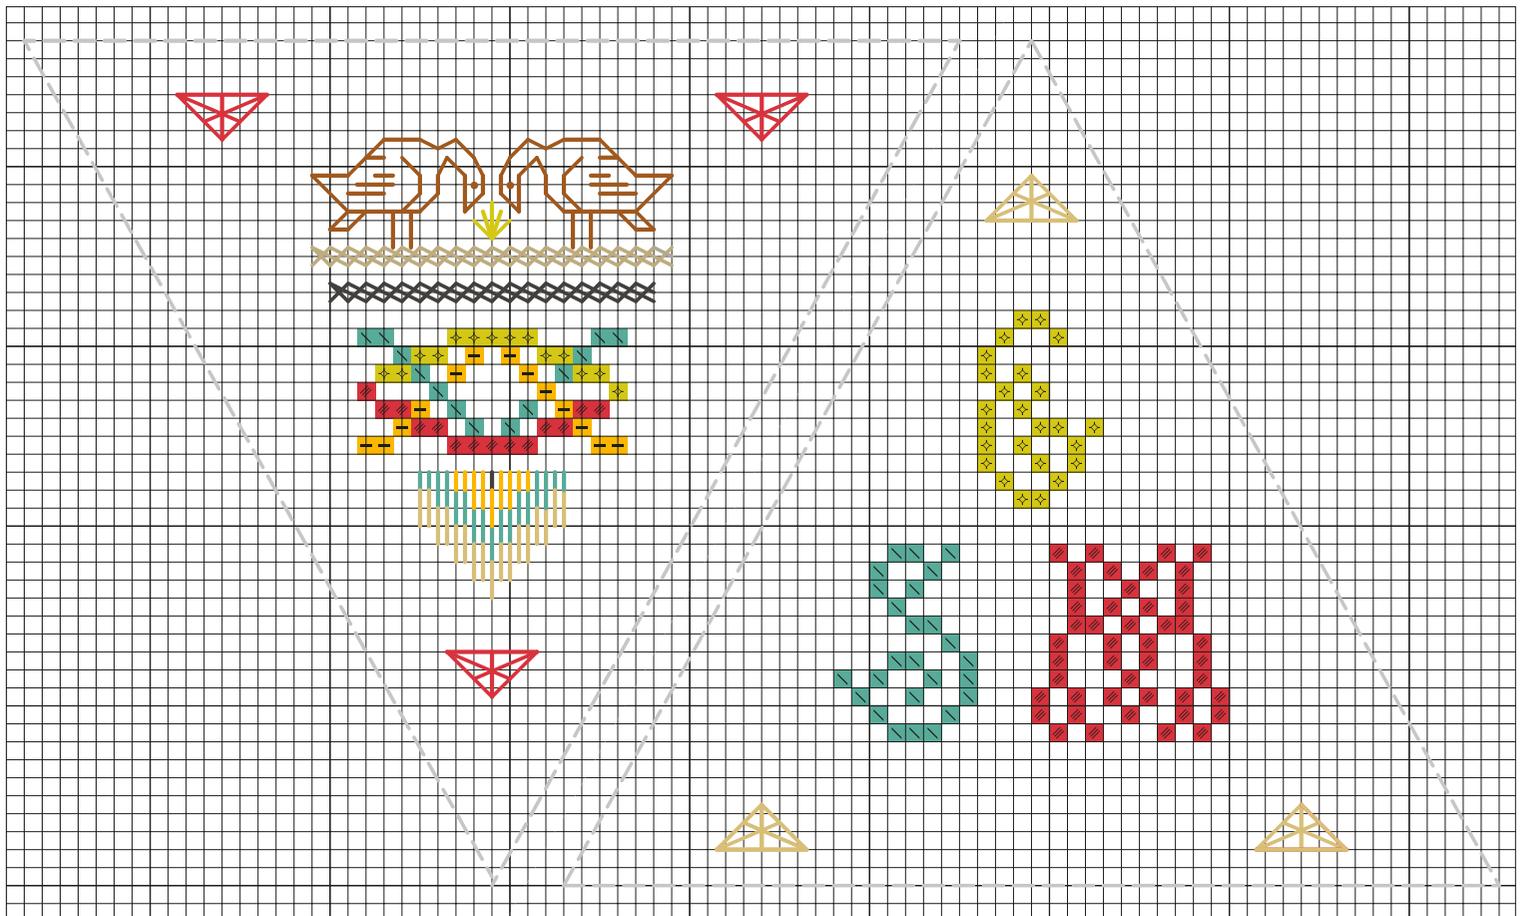

LID & BASE PANELS

# ERRATA

STITCH GUIDE (FIRST PRINT EDITION ONLY)

p.109:

There is an error in step 4 of the instructions for working Celtic Cross Stitch. The correct sequence is shown below:

CELTIC CROSS STITCH

Also known as woven cross stitch, this can be used as a filling or as an ornate border. The second cross can be worked in a different colour if desired.
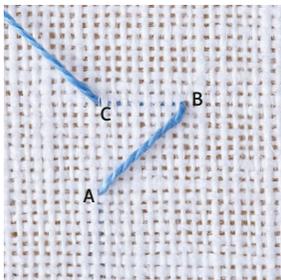

1. Work a stitch from A to B and emerge at C.
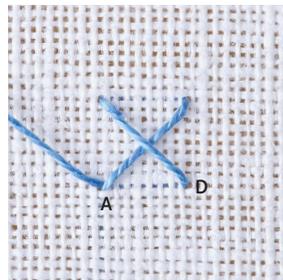

2. Take the thread to the back at D and re-emerge at A.
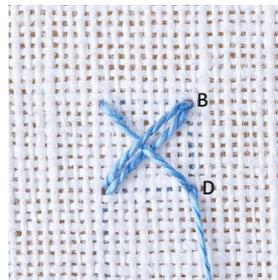

3. Take the thread over the first cross and to the back at B. Re-emerge at D.
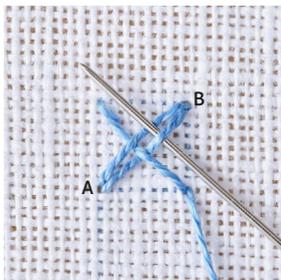

4. Take the needle under the lower and over the upper threads between A and B.
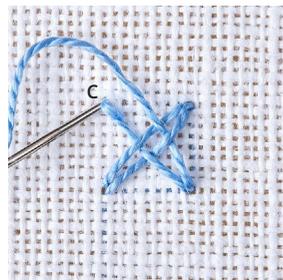

5. Take the needle to the back at C.
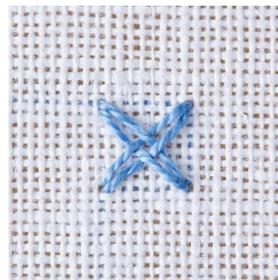

6. Pull the thread through. The threads should have a woven appearance at the centre of the cross.
